

SIGNIFICANTLY INCREASES THE ACTIVITY AND EFFECTIVENESS OF JET-AG® PERACETIC ACID ALONG WITH OTHER INSECTICIDES, FUNGICIDES AND HERBICIDE PRODUCTS.

Jet+Surf is based on a synergistic combination of powerful anionic surfactants that provide superior surface and penetration activity to dramatically improve and enhance Jet-Ag® peroxyacetic acid and other insecticides, fungicides and herbicide products commonly used in crop production.

DIRECTIONS FOR USE: For use with Jet-Ag®, mix 12-24 ounces of Jet+Surf to 100 gallons of water. Due to the foaming nature of this product it should be added last to the mixing tank. Use an anti-foamer agent when needed. This product is shown to be compatible with common pesticides, however, a mix test is always recommended.

DISPOSAL: Jet+Surf is readily biodegradable and environmentally friendly. Dispose of using in accordance with state and local regulations

IN COMPLIANCE WITH:

40 CFR 180.910 (EPA), 40 CFR 180.920 (EPA),
40 CFR 180.940 (EPA),
And 21 CFR 173.315 (FDA) CA Reg. 1051177-50003-AA

DISPOSAL:

Product is readily biodegradable. Dispose of using normal septic or municipal sewage facilities according to local and state regulations.

PRINCIPAL FUNCTIONING AGENTS

Alkyl benzenesulfonic acid,	
2-ethylhexyl sulfate sodium salt	18.43%
Constituents ineffective as adjuvant.....	81.57%
TOTAL	100.00%

CAUTION:

Keep out of reach of children. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Call poison control center or doctor for treatment advice.
